Minister, Clerk, DM,

Overall the protest has diminished significantly from its peak yesterday afternoon. Very few people and around 20 large vehicles remain. The crowd on Broadway largely dispersed by 11pm and there was no horn honking into the night. Currently the area is quiet as you can see in the attached photo. After the crowd dispersed, WPS pulled out all of its resources. Our protective services staff remained at the entrances to the Precinct and reported no issues involving them overnight. Access to the Precinct, other than through the main entrance on Broadway is still open and controlled by Protective Services.

However, two incidents did occur overnight, unclear if they were before or after WPS pulled out. The most serious was a protestor or protestors were run over by a vehicle driving down Broadway. WFPS and WPS attended where 3-4 people were apparently taken to hospital. The driver was arrested. The second incident apparently involved a female protestor who was assaulted and had her flag taken. A description of the alleged suspect was posted online, but it is unknown if the incident was reported to WPS. There is a video of a protestor being run over circulating online at this link about ¾ of the way through, I caution that the images are disturbing - [https://www.youtube.com/watch?v=nzO71-A4f\\_Q](https://www.youtube.com/watch?v=nzO71-A4f_Q).
